

Insect Track & Sign Resources

Recommendations from Eric Vehe (ericvehe@gmail.com)

Note: all titles are hyperlinked to the listed resource

Books

- [Tracks & Sign of Insects and Other Invertebrates](#) by Noah Charney & Charley Eiseman
 - Appears to currently be hard to find from most retailers. I have contacted the publisher about the status of this book.
- [Garden Insects of North America \(Second Edition\)](#) by Whitney Cranshaw and David Shetlar
 - The second edition is worth getting rather than the first edition.
- [Leafminers of North America \(ebook\)](#) by Charley Eiseman
- [Stokes Guide to Observing Insect Lives](#) by Donald Stokes

Websites

- [Gallformers – gallformers.org](#)
- [Bug Tracks blog \(by Charley Eiseman\) – bugtracks.wordpress.com](#)
- [Bug Guide – bugguide.net](#)

Other Resources

- [iNaturalist](#) – incredible ability to use photos to identify galls, insects, plants, etc. using either mobile app (most convenient) or desktop browser page
- [Bugs in Winter with Charley Eiseman](#) – online, on-demand course from North Branch Nature Center in VT. Fascinating and loaded with information.
